

CS506-P1-Part1-README

Name: Yiqing Fan ID: 9082062952 Due: 2020.01.27

This is the first part of P1. It requires us to write a test program *P1.java* to test classes. To run the program, simply type the following command in terminal

```
> javac P1.java && java P1
```

The output will contain Correct/Error messages as well as some printed symbol tables. If the classes are implemented correctly, the outputs are expected to be all Correct with no Error.
