

CS536-P4-README

Name: Yiqing Fan, Xingyun Mao Group: P4-Pair 19 Due: 2020.03.30

Files

In this project, we built the name analyzer, and wrote correct input and error input test cases. The main files are

- *P4.java*: The driver program to scan, parse, name analyze, and unparse input source code
- *ast.java*: The file where name analysis function lies
- *test.wumbo*: The correct input file with answers in comment
- *nameErrors.wumbo*: The error input file with answers in comment

Testing

To test our file, first navigate to the project folder, and then execute the following command

```
> make; make test
```

The output of *test.wumbo* will be *test.out*, you may compare the content with provided answer in comment.

The output of *nameErrors.wumbo* will be *nameErrors.out*, you may compare the printed console error message with provided answer in comment
